
More than just line 230 error

Posted by MCM - 2008/06/20 09:27

Hi Ian,

everything went exactly according to the instructions EXCEPT that when I first looked the site and saw the anticipated error message (which DID disappear after a refresh) there were more than the line 230 error message (in fact I didn't see that line mentioned).

There were 6 lines around the 250-256 line mark. Unfortunately I had already refreshed the page before I realised something was not as I thought so missed my chance to copy them.

As i said, they all disappeared anyway. My question is "Am I still good to go"?

Also, when can I expect my products to appear in my Google Base account? I put the All Products setting at 1 every day.

Thanks

Martin
