
Site was hacked

Posted by da8ivr - 2007/12/29 19:44

Some complete arse decided to hack our site during Dec 2007. So as i didn't have the time to fix it i dropped a job on Joomlancers to have it fixed and the freelancer destroyed the forums whilst trying to fix it. He clicked add sample data, then remove sample data, which destroyed them.

I still have the sql database backed up, which does contains the old posts, but as i try to add it, it shows many errors, so if you know how to fix this, please let me know.

These forums are fresh and new from 29th Dec 2007, if you have any thoughts please drop me a note.

All the best for the new year

Ian
